

# SPARES MANAGEMENT

**Big Data  
Intelligence**  
Made Simple

## Meet "Q"

### Next Generation ERP: The Heart of Spares Management

- Our customized ERP System "Q" manages operations including: order & purchase management, inventory, shipments, RMAs and testing & repair.
- Our complementary global IT sourcing platform maps availability of equipment from hundreds of operators and 500+ resellers through consignment and inventory exchange programs.
- "Q"'s e-commerce portal tracks customer interaction, including real time market pricing and demand.
- The web-based customer dashboard empowers customers permitting tracking of repairs and orders, easy search and print of documents and ready review of customized reports.
